

# Encore is the Best Choice for Your Project. Why?

## OUR TESTING PROVES IT

An ISO 9001 independent laboratory was hired to determine how Encore rates among traditional products. Encore was tested for skid-resistance, adhesion, and wear resistance – three important criteria for a walking surface. Testing proved that Encore, a water-based green product, sets a new level of performance for all coating products.

TEST DESCRIPTION	ASTM	RESULT	INTERPRETATION
Skid-Resistance	D-2394-05	Static = 1.33 Kinetic = .62	Twice the ADA requirement for commercial flooring applications.
Adhesion	D-3359-09 (B)	Rating = 5	0% Adhesion loss. 100% performance.
Abrasion/Wear	D-4060-07 CS-17 wheel Load = 1,000g	1,250 cycles/mil	Up to six times more wear resistant than average floor coatings. Twice as resistant than top-of-the-line durable coatings.

## OUR EXPERIENCE PROVES IT

Encore's two top coating formulators have over fifty years of experience in developing and installing coatings. Our formulations have been used for over three decades and those applications are still in service. No other coating manufacturer can make such a claim. Our experience is in your corner the instant you choose Encore.

## OUR HISTORY PROVES IT

We have been involved with hundreds of successful coating projects. Some of those projects are some notable and some typical. Notable projects include the Statue of Liberty pier, Fisherman's Wharf, the Port of Los Angeles, and many state and local structures.

31 yrs and counting.

25 yrs and counting.

18 yrs and counting.

Encore can be purchased at authorized resellers or online at [encorecoatings.com](http://encorecoatings.com). Encore is backed by a limited warranty. Please visit our website for details.
