

The Most Versatile Metal Coating on the Planet.

Compare RustOx to your favorite coating, and you'll have a new favorite coating.

Capabilities & Advantages

- Water-based, low VOC.
- Superior performance in fresh & saltwater environments - exposed or submerged.
- Suffocates surface rust.
- Prevents rust bleed-through.
- Can be used as a primer or left as a top coat.
- Available in virtually any color.*
- Can be top coated with any paint, including aliphatic polyurethanes.
- Dry & Re-coat time is an unbelievable 7-10 minutes.
- Applies with brush, roller, or sprayer.
- Water cleanup means no flammable solvents on job site.
- Does not require preheating of the substrate, saving time and energy cost.
- Indefinite pot life.
- Can be applied to any metal substrate.
- Minimal prep and quick cure time means minimal time out of service.

* Inventoried in white or black, but can be custom tinted on orders over 150 gallons.

- Can be applied directly over rust.
- Does not require priming.
- Can be applied in temperatures that sideline other coatings (rated for 40 - 90 degrees F).
- Unaffected by welding activities.
- Flame retardant, non-combustible.
- Superior heat resistance.
- Superior chemical resistance.
- Ductile properties maximize impact strength. Won't crack on impact.
- Can be used above or below grade.
